

Extend and Customize Adobe Experience Manager v6.x

Objectives:

After completing this course, you should be able to:

- Use Eclipse for site development
- Use Maven to build projects
- Describe the workings of the Sling architecture
- Write your own test suites and cases
- Package and deploy your site

Course Description:

Extend and Customize Adobe Experience Manager v6.x (formerly known as AEM Sites: Advanced Developer) is a three-day course, instructor-led (classroom and virtual), that provides real-time experience in developing and managing sites using Adobe Experience Manager. This course will cover topics on how to create custom OSGi services and Sling servlets, along with hands-on exercises. Participants will learn to use Eclipse, Maven, and FileVault for development. This course is suitable for advanced/back-end developers.

Course Outline:

- Architecture Stack
- Installation
- Authoring Basics
- Leveraging the Developer Toolset, I & II
- Using OSGi Services
- Configuring Run modes and Config nodes
- Deep Dive into Sling
- JCR Deep Dive
- Indexing and Search
- Configuring Custom Log Files
- Developing and Extending Workflows
- Building Integration Points
- Data Migration
- Writing Tests
- Extending the Operations Dashboard

SOLUTION PARTNER
