

AEM Forms 6.x Architect

Objectives:

After completing this course, you should be able to:

- Compare options for data and content migration, identifying the pitfalls and impact on project schedules
- Identify important security concepts for an AEM installation, including end user security and user management, personalization, and login modules
- Produce scalable, high performance, user-friendly solution designs based on CRX, OAK and AEM principles
- Create cacheable implementation plans by referencing solution designs from peer work group session using HTTP and REST principles
- Identify how to increase availability and performance by following clustering and load balancing principles in an AEM deployment

Course Description:

This course is designed for Adobe Experience Manager architects and Senior Adobe Experience Manager developers to accelerate learning and understanding of recommended practices for AEM. Participants will gain knowledge of Adobe Experience Manager's architecture design, migration methodologies and recommended practices, integration with Adobe and 3rd party solutions, and performance optimization. Collaborative exercises will challenge the participants, driving the creation of solution designs and applying them to implementation walk-through with their peers.

Course Outline:

- Exploring Experience Manager Technical Infrastructure
- Planning Content Migrations
- Preparing Operational and Application Security
- Persistence Management, Oak Queries and Indexing
- Building Integration Points
- Optimize Performance & Troubleshooting
- Creating Solution Designs
- Performing Implementations

Overview:

Learn the technical architecture, platform, and some topologies for both AEM Forms JEE and AEM Forms OSGi.

Duration:

3 Days

Training Methods:

- On-site at Customer's facility anywhere around the world
- Public Classroom Training
- Virtual/Online Training

Audience:

This course is designed for Experience Manager Architects and Senior Developers

Prerequisites:

This is an advanced technical course requiring prior development knowledge and project experience with AEM.
