

# Administer and Securely Maintain Adobe Experience Manager v6.x

## Objectives:

After completing this course, you should be able to:

- Manage and configure the Adobe Experience Manager server
- Manage users, indexing, and integrate LDAP and SSO
- Backup, restore, and create custom log files
- Troubleshoot general server issues
- Perform Adobe Experience Manager maintenance tasks such as backups

## Course Description:

Administer and Securely Maintain Adobe Experience Manager v6.x (formerly known as AEM System Administrator) is a three-day, instructor-led (classroom and virtual) course, where you will learn how to configure, maintain, and troubleshoot Adobe Experience Manager. This course will cover Adobe Experience Manager files and directory, and will show you how to find important log files and adjust the logging configuration. Along with hands-on exercises, participants will learn about Dispatcher, Mongo DB, SSO, LDAP, user administration, security, and performance tuning.

## Course Outline:

- Introduction
- Installation of Adobe Experience Manager author and publish instances
- UI Introduction and Authoring Basics
- Administrative Interfaces
- Package Manager and CURL
- OSGI Bundles, Log Files and Runmodes
- Operations Dashboard
- Replication Agents
- Dispatcher with Apache web Server
- Oak Queries and Indexing
- Introduction to MongoDB
- Recommended Deployments and Scaling AEM with MongoDB
- AEM Maintenance
- User Administration and Security
- LDAP and SSO
- Performance Tuning
- Security Checklists

## Overview:

Formerly known as 'AEM Sites: System Administrator' course, this course teaches how to configure, maintain, and troubleshoot AEM. You will also learn about Dispatcher, user administration, and security.

## Duration:

3 Days

## Training Methods:

- On-site at Customer's facility anywhere around the world
- Public Classroom Training
- Virtual/Online Training

## Audience:

This is a highly technical class, designed specifically for System Administrators.
