RHOMBUZZ

Generate and Assemble PDFs using AEM Forms PDF Generator 6.x

Objectives:

The learner will develop a PDF generation and archive solution to the extent that:

- Workbench is used in a lab setting
- Multiple document inputs are handled
- PDF Generator is used to generate a PDF Portfolio and a PDF/A document for archive
- Functionality is achieved as per lab requirements

Course Description:

This workshop focuses on building AEM Forms applications using the PDF Generator module. This workshop consists of lectures and demonstrations combined with a series of exercises that focus on PDF Generator and introduce Assembler. The result is the creation of a PDF generation and archive solution. Topics covered include creating portfolios based on multiple document inputs. The workshop uses AEM Forms Workbench, which is the integrated development environment (IDE) for creating AEM Forms applications.

Course Outline:

- Introduction to AEM Forms PDF Generator ES4
- Handling Multiple Files with PDF Generator
- Using Document Builder to Create DDX Files
- Creating Archival PDFs

Overview:

Learn how to use the AEM Forms PDF Generator module to create PDFs from multiple file types (like Word or Excel), assemble PDF/XDP files using DDX and create PDF portfolios.

Duration:

1 Day

Training Methods:

- On-site at Customer's facility anywhere around the world
- Public Classroom Training
- Virtual/Online Training

Audience:

Java Developers and Business Process Developers.
